

*“The benefits from SAP BPC include a significant reduction in time spent compiling our data and improvement in our ability to analyze data at a much greater level of detail. We have streamlined the close process and improved our ability to make decisions with greater transparency to our data.”*

**Denise Torres**  
Assistant Controller  
Alexander & Baldwin

## Alexander & Baldwin consolidates multiple GL's with SAP BPC

### challenges and opportunities

- Actual data was stored in multiple GL's
- Completing consolidations for financial reporting was manual and labor intensive
- Lack of consistent processes for planning, budgeting and forecasting

### objectives

- Provide unified solution for all subsidiaries to manage cash flow, planning, budgeting and forecasting
- Improve transparency of data
- Streamline monthly close process

### implementation highlights

- Consolidated actual financial data from six General Ledgers across multiple ERP solutions
- Provided a cash flow template to enable subsidiaries with one work paper methodology

### why Akili/SAP

- Functionality including familiar excel interface, security, and multi-level roll-up capability
- Professional sales process, demo and references
- Clarity of platform and product direction

### benefits

- Decrease manual processes and overall workload for accounting team
- Improved transparency of data
- Improved capability to provide detailed internal reporting for strategic decision support
